

Cross-Platform Analysis

Result

No overlapping markets found.

Scanned 200 Polymarket markets and 100 Kalshi non-sports markets. Zero matches.

Why

The platforms trade different things:

- **Polymarket:** Trump deportation numbers, cabinet confirmations, near-term politics
- **Kalshi:** Mars colonization, next Pope, climate milestones - long-term speculative

There's no event traded on both platforms right now.

When This Would Work

Cross-platform arbitrage requires identical events. Historical overlap existed during:

- 2024 US presidential election
- Fed rate decisions

Current state: platforms have diverged. No actionable opportunity.

Conclusion

Built the infrastructure. No current use case. Would need to monitor for future overlap (e.g., 2026 midterms, major Fed meetings).
